Version 9.0.50**Overview**

These release notes are the companion to the AIRS v9.0.50 upgrade package. It is recommended that all AIRS users review these release notes to best understand the additions and modifications that are to in this upgrade.

Login Screen**• LOGIN SCREEN**

- The link 'Forgot Password' has been enabled for all agencies.
- Programming has been completed to automatically clear broken login connections when user's sessions ended unexpectedly. This should significantly reduce the number of requests AIRS System Administrators received to manually clear broken connections in the Login History.

Agency Setup**• REFERRAL LIBRARY**

- The following fields have been removed from entries:
 - Referral In
 - Referral Out
 - Placement
 - Service Type

Note: All active referral organizations will be available for selection when making referral entries.

Historical Information**• LABORATORY AND PSYCHOLOGICAL TESTING**

- Test Type: (HS) Herpes Simplex Virus (HSV) 1/2
 - Programming has been completed to require a Test to be entered, in order to enter Test Results.
 - The field Treatment Not Medically Indicated will now be enabled when Test Results are entered.

• REFERRAL TRACKING

- The following *Referral Services* have been added to *Referral Category (100) Medical Health*:
 - (350) Mpox Testing/Screening
 - (351) Mpox Treatment
 - (352) Mpox Vaccine

- The following fields have been removed:
 - Priority
 - Date Need Identified
 - # Appointments Per Week
 - Appts. Being Kept
- The field, Follow-up Method is now an optional field.
- **UPDATE TICKLER**
 - It was reported that the date of HIV Status Information was sporadically appearing as incorrect on the update tickler. Programming has been completed to address this issue.

Hepatitis

- **HCV RAPID TESTING**
 - Programming has been completed to ensure that HCV Risk Information entered on the same date as testing in other areas of the system (Agency Intake, CTR, Etc.) is properly displayed.
- **HCV TREATMENT STATUS**
 - *For the initiatives:*
 - BHC HCV Care and Treatment
 - BHC Innovation Models of Care
 - Other
 - Date of first HCV Medical Appointment has been added. It will be enabled when the question, Did the patient attend their HCV medical appointment? Is answered Yes.
 - Date of SVR Assessment has been added. It will be enabled when Treatment End Date is entered, and Treatment Outcome is (01) Completed or (12) Completed- Not Cured.
- The following Initiatives have been added:
 - HCV Navigation in High-Risk Settings
 - HCV Care Coordination in OTPs

Note: Both initiatives will include the same data fields as BHC HCV Care and Treatment, BHC Innovation Models of Care, and Other.
