**EXTERNAL REPORTING APPLICATION (ERA) USER'S GUIDE**

ERA is a reports application for use with AIRS data. It is maintained and updated by AI. The current version is **1.0.8.8**. AI periodically releases updated versions of ERA and new reports.

ERA installation, upgrade and reports downloads: <https://airs.freshdesk.com/support/login>. If users already have ERA, they only need to download and apply the upgrade.

The **ERA login** is the same as the user's **AIRS login**.

ERA can be run when other users are in AIRS. Users can be in AIRS and ERA simultaneously.

**USER ACCESS TO ERA**

Users with access to client level reports in AIRS will have access to ERA.

## External Reporting Application (ERA) User's Guide

### DOWNLOADING ERA SOFTWARE AND REPORTS

AIRS users need to have a Freshdesk account from Netsmart to access AIRS TA and downloads, including the ERA.

Go to the Freshdesk website to download installation files, upgrade files and individual reports.

<https://airs.freshdesk.com/support/login>

Click on > Solutions - AIRS Knowledge - ERA Downloads

Over 50 ERA reports are contained in the installation and upgrade files.

Be sure to read the instructions carefully for installing and loading reports.

### ERA Downloads (4)

-  [ERA Install and Upgrade Instructions](#)
-  [ERA v1.0.8.8 Install package](#)
-  [ERA v1.0.8.8 Upgrade Package](#)
-  [ERA Reports User Guide](#)

The first report run in an ERA session will take a few seconds longer as the system loads the viewer software into memory. Subsequent reports in the same session will run faster.

### RUNNING REPORTS

Reports are located in the reports library found under "Reports / Run Reports".

Most reports use a date filter, which is always the first to be completed and often determines the contents of other filters. (e.g., a report on service data will only show Programs, Service Categories, etc. that were provided during the given time period.)

### NEW REPORT REQUEST

Users can submit a report request by clicking "Reports / Report Request". This brings up a report request form in a web browser for completing and sending to AI. These should be detailed and contain an attached report mock up. Report requests are reviewed by AI db managers and prioritized based on extent of need.

### ERA REPORT MENU

ERA has an extensive list of reports with more added throughout the year. This menu provides a brief summary of what each report does.

Reports that are useful for comparing to the RCMR and/or otherwise highly recommended for the purposes of program monitoring and evaluation are highlighted.

Additionally, each report may be previewed in ERA by right clicking on Report Name and selecting "Documentation".

Report Name	Report Location	Recommended Use
<b>Planning Data Report – Active Services</b> Displays planning data for active services only	<i>Agency Setup</i>	
<b>Active Clients by Intake Program (Date of Last Service)</b> Detailed report of active clients by intake program and date of last service which can be used to close clients who have not been served for 6, 9 or 12+ months	<i>Client Info</i>	
<b>Client Referral Details</b> Details of client referrals	<i>Client Info</i>
