

# Linkage and Navigation Services (309)

Linkage and Navigation (L&N): Is a process to help a person (HIV positive or High Risk Negative) obtain timely, essential and appropriate medical, prevention and support services to optimize his or her health and prevent HIV transmission and acquisition. L&N is accomplished through active methods of client engagement including appointment scheduling, reminders, transportation/escort to appointments, assistance with health insurance forms, addressing food insecurity, etc. The goal of L&N is to actively engage the client in a comprehensive assessment process to identify obstacles/ unmet needs and develop an action plan to eliminate/reduce these barriers and support positive change
